

OC IT Projects — Chapter 4

Media & Cabling Distribution — Content Quiz

Focus: Technical content and understanding, not chapter structure.

Q1. Which statement correctly describes UTP?

- A) Shielded Twisted Pair
- B) Unshielded Twisted Pair
- C) Single-Mode Fiber
- D) Shielded Coaxial Pair

Q2. What is the main difference between UTP and STP?

- A) UTP uses fiber while STP uses copper
- B) STP is shielded while UTP is unshielded
- C) UTP is wireless while STP is wired
- D) STP uses single-mode fiber

Q3. Which standards are relevant when terminating copper twisted-pair cable?

- A) 802.11a / 802.11b
- B) 568A / 568B
- C) TCP / UDP
- D) IPv4 / IPv6

Q4. If a Switch does not support MDIX, which cable does the training specify?

- A) Crossover
- B) Straight-through
- C) Fiber
- D) Coaxial

Q5. Which two cable types are discussed for device connections?

- A) Straight-through and Crossover
- B) MMF and SMF
- C) UTP and Fiber
- D) Coax and Fiber

Q6. Which is specifically covered under Copper Cable?

- A) Cable Throughput
- B) IPv6 Compression
- C) DHCP DORA
- D) Routing Tables

Q7. What are the two fiber types presented?

- A) UTP and STP
- B) MMF and SMF
- C) Coaxial and UTP
- D) Copper and Wireless

Q8. Multimode Fiber is abbreviated as:

- A) SMF
- B) MMF
- C) MDF
- D) IDF

Q9. Single-Mode Fiber is abbreviated as:

- A) SMF
- B) MMF
- C) STP
- D) SFP

Q10. Which descriptions appear with the Specialized SC Connector?

- A) Push and Pull
- B) Stick and Click / Stick and Twist
- C) Lock and Slide
- D) Twist and Lock

Q11. According to the training, the specialized SC connector is usually used by:

- A) Routers
- B) Printers
- C) Firewalls
- D) Servers

Q12. Which is listed as a Fiber Optics topic?

- A) Fiber Optic Advantages
- B) Collision Detection
- C) VLAN Trunking
- D) DHCP DORA

Q13. What is listed alongside Fiber Optics as a separate topic?

- A) Media Converters
- B) Routing Tables
- C) DNS Servers
- D) NAT

Q14. Which Chapter 4 component should you think about when converting between different network media types?

- A) Media Converter
- B) Punch-down Block
- C) MDF
- D) Crossover Cable

Q15. MDF stands for:

- A) Main Distribution Frame
- B) Media Distribution Fiber
- C) Main Data Format
- D) Multiple Distribution Frame

Q16. IDF stands for:

- A) Internal Distribution Fiber
- B) Intermediate Distribution Frame
- C) Internet Data Frame
- D) Integrated Distribution Fiber

Q17. Which component is associated with organizing/terminating copper cabling in Cable Distribution?

- A) Copper Patch Panel
- B) Fiber Optic Connector
- C) Router

D) Transceiver

Q18. Which Patch Panels are explicitly covered?

- A) Copper only
- B) Fiber only
- C) Copper and Fiber
- D) Wireless and Copper

Q19. A Fiber Patch Panel means you are dealing with:

- A) Copper
- B) Fiber Optic
- C) Coaxial only
- D) Wireless

Q20. 568A / 568B and wire arrangement in a Twisted Pair cable are related to:

- A) Pinouts
- B) Routing
- C) IP Addressing
- D) Fiber Modes

Q21. Which belongs to Fiber Optics, not Copper?

- A) UTP
- B) STP
- C) MMF
- D) Coaxial

Q22. Which belongs to Copper Media?

- A) SMF
- B) MMF
- C) Coaxial
- D) Fiber Connector

Q23. MMF vs SMF compares:

- A) Two copper cable standards
- B) Two fiber optic types
- C) Two connector standards
- D) Two patch panel types

Q24. Which is explicitly mentioned regarding copper cable?

- A) Plenum and Non-Plenum Cable
- B) DHCP and APIPA
- C) VLAN and Trunking
- D) NAT and PAT

Q25. To identify Straight-Through vs Crossover and review 568A/568B, which concepts are needed?

- A) Twisted Pair + Cable Types + Pinouts
- B) Fiber + MMF + SMF
- C) MDF + IDF + Fiber Patch Panel
- D) Router + Routing Table + IP Address

Answer Key

1-B | 2-B | 3-B | 4-B | 5-A

6-A | 7-B | 8-B | 9-A | 10-B

11-A | 12-A | 13-A | 14-A | 15-A

16-B | 17-A | 18-C | 19-B | 20-A

21-C | 22-C | 23-B | 24-A | 25-A

Quick Review

- UTP = Unshielded Twisted Pair; STP = Shielded Twisted Pair.
- 568A / 568B = pinout standards in the training.
- If a switch does not support MDIX, the training specifies Straight-Through.
- MMF = Multimode Fiber; SMF = Single-Mode Fiber.
- Specialized SC: Stick and Click / Stick and Twist; usually used by routers.
- MDF = Main Distribution Frame; IDF = Intermediate Distribution Frame.
- Cable Distribution includes Punch Down Blocks, Copper Patch Panels, Fiber Patch Panels, and a typical copper cable installation.
